Options to a standard home inspection are listed below:

“Informal” inspections”:

Occasionally ordered by the buyers of ‘As-Is’ homes, or for the Sellers of homes that would like an inspection and consultation afterward - regarding the condition of the home, but do not need a written report to be produced, and want to save some money.

Note: The only difference between this type of inspection and a standard inspection is the lack of a formal written report.

Less office time for us, means savings for you.

Rates start at just \$225!

“Partial / specific inspections”:

Limited in scope, and priced according to specifics by the client, but generally are between \$75 and \$200.

The client simply tells us which areas of the home they are concerned about (Such as a crawl space or ground water issue, we check the areas and provide a summary report and brief consultation.
